Education

University of British Columbia

BSc Combined Computer Science and Physics | First-Class Honours

- Dean's Honour List

Vancouver, Canada
Sep 2020 – Apr 2025

Technical Skills

Languages C#, Python, JavaScript/TypeScript, Go, C/C++, Java, SQL

Frameworks .NET, React, Node.js, Express, TensorFlow

Infrastructure Docker, Git/GitHub, GitHub Actions, Azure DevOps, CI/CD

Cloud & Data AWS, Azure, PostgreSQL, MongoDB, REST APIs, RAG, OpenAI API

Experience

Solirius Reply

Software Engineer

London
Jan 2026 – Present

- Developing C#/.NET backend services for Homes England's digitalisation of the **£24.7 billion** Help to Buy loan portfolio.
- Contributing to alpha-stage development and testing in Azure DevOps, including preparation for a UK Government Digital Service assessment.
- Organised an AI-assisted engineering hackathon for **20+ participants**, using Microsoft Copilot to prototype solutions within the project's .NET architecture.

3DQue

Full-Stack Software Engineer

Vancouver
May 2024 – Jan 2025

- Refactored React/Tailwind components and built a tagging system for 3D-print jobs, reducing item-location time by **40%**.
- Re-engineered Go API endpoints for improved concurrency, reducing response times by **43%**, from **1.4s to 0.8s**.
- Developed Direct2Print integrations connecting Shopify and Etsy orders to automated 3D-print workflows.

MineSense | 7x Global Cleantech 100 Scaleup

Software Engineer

Vancouver
May 2022 – Jan 2023

- Developed Python data-capture and diagnostics tools for ShovelSense R&D, improving real-time telemetry quality by **37%**.
- Built software interfacing with XRF detector hardware, cutting sensor test time by **over 50%** and doubling bench throughput.
- Introduced CI/CD pipelines for deployment and vulnerability detection, identifying **10+ issues per week**.

Projects

yapyap | React Native, Python, TensorFlow, MongoDB, AWS

nwHacks Winner

Vancouver
2024

- Co-developed an award-winning journaling app and trained a bidirectional RNN in TensorFlow for sentiment classification.
- Built AWS REST endpoints and a MongoDB data model for users, entries and tags.

Amazon RECRUIT | React, Node.js, Express, PostgreSQL, Docker, OpenAI API

Amazon-sponsored Academic Project

Vancouver
2025

- Collaborated with Amazon engineers to ship an AI recruiting platform in **four months**, covering job posts, applicant tracking and AI screening.
- Implemented RAG-based interviews with the OpenAI API, generating technical and behavioural questions grounded in candidate CVs.
- Containerised services with Docker and built GitHub Actions CI/CD workflows for testing, builds and deployment.

Achievements & Qualifications

2025 **IBM RAG and Agentic AI Professional Certificate**, IBM

2024 **AI in Software Development Certificate**, DeepLearning.AI

2024 **Best Design & Community Track Winner**, nwHacks

2024 **Sustainability Track Winner**, StormHacks

2023 **Research Grant**, Google Vulnerability / LLM bugSWAT
